PROFESSIONAL SUMMARY

First-year Management and Engineering for Manufacturing student at the University of Connecticut. Interested in manufacturing engineering, operations, and project management. Experience with computer assembly, troubleshooting, and CAD modeling through coursework. Demonstrated teamwork, problem-solving, and communication skills through professional and leadership experiences. Seeking a Summer 2027 internship to obtain engineering experience and develop my technical and professional skills.

EDUCATION

University of Connecticut (UConn) — Storrs, CT | Expected May 2030

Bachelor of Science, Management and Engineering for Manufacturing (MEM)

- Relevant study: Multivariable Calculus (Calculus III); introductory engineering coursework and CAD modeling.
- UConn Early College Experience (dual enrollment): 19 credits; GPA 3.663/4.000 across Chemistry I–II, Calculus-Based Physics I–II, and Environmental Science.

TECHNICAL SKILLS

CAD & Design: Onshape; part modeling, sketching, dimensions, and assemblies

Technical: Component selection and compatibility research, computer hardware assembly, troubleshooting, airflow verification

Collaboration: Explaining technical concepts, teamwork, task coordination

ENGINEERING PROJECTS

Skateboard CAD Model and Assembly | Onshape, ENGR 1000

- Assembled and modeled skateboard components in Onshape following a course provided tutorial
- Used sketches, dimensions, and part relationships to assemble the deck, truck, wheels, and other components.

Custom PC Build for a Friend | Hardware Research, Assembly & Troubleshooting

- Researched and selected PC parts for a friend; assembled the PC while explaining hardware and steps required.
- Investigated red motherboard CPU light issue by removing and reinstalling RAM.
- Resolved nonworking PC fans by reconnecting into different motherboard fan headers.

Personal PC and Workstation | Independent Technical Project

- Individually researched and selected components for a custom desktop and workstation for 1440p use.
- Verified the fan airflow problem using a paper test, ordered replacement fans to correct airflow

WORK EXPERIENCE

Chili's — Food Runner / Host / Busser | May 2025 – Aug 2026

- Coordinated with staff to ensure fast and accurate orders during busy shifts
- Adapted between food running, hosting, and bussing based on what was needed.

Jersey Mike's — Team Member | Feb 2025 – Jun 2025

- Prepared and packaged customer orders, managed register, restocked, and maintained a clean environment

LEADERSHIP & ACTIVITIES

Camp Invention — Leadership Intern, Southington, CT | Three summers; 120 volunteer hours

- Supported elementary students with hands-on STEM projects and ideas while helping with assembly, brainstorming, and tool use.

Member: UConn Management and Engineering for Manufacturing Club; American Society of Mechanical Engineers (ASME)
